

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

STATEMENT UNDER 37 CFR 3.73(b)Applicant/Patent Owner: Agere Systems Inc.Application No./Patent No.: 10/552,601 Filed/Issue Date: October 5, 2005

Entitled: Method and Apparatus for Shared Multi-Bank Memory

Agere Systems Inc., a Corporation
(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that it is:

1. ☐ the assignee of the entire right, title, and interest; or
2. ☐ an assignee of less than the entire right, title and interest
(The extent (by percentage) of its ownership interest is _____ %)

in the patent application/patent identified above by virtue of either:

A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or for which a copy thereof is attached.

OR

B. ☐ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1 From: Inventors To: Terablaze, Inc.

The document was recorded in the United States Patent and Trademark Office at
Reel 014241, Frame 0363, or for which a copy thereof is attached.

2 From: Terablaze, Inc. To: Agere Systems Inc.

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

3 From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

☐ Additional documents in the chain of title are listed on a supplemental sheet.

☐ As required by 37 CFR 3.73(b)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

Title

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Schedule 3.13(a)

TeraBlaze, Inc. Patent Applications:

**Title: Switching Fabric Architecture
Matter No. TERA 1000-1US
Provisional Application Expired**

**Gray Cary\PA\10336248.4
2101872-3**

Application #: 60/362,144

Description: A Cashmere Fabric is a modular switch fabric built from identical Cashmere Modules. Fabric with 16 to 128 10-Gbps ports and various topologies can be built with Cashmere Modules. Using the companion Pachmina IC, five such fabrics can be connected in parallel to build fabrics with 16 to 128 40-Gbps ports with 1:4 redundancy. Accordingly, TeraBlaze fabrics range in throughput from 160 Gbps to 512 Tbps. Blocking architecture with a larger throughput can also be designed.

Title: Striping Algorithm for Switching Fabric

Matter No. TERA 1000-2US

Utility Application Pending

Application #: 10/269,928

Description: The invention relates to packet-based switching fabrics, and more particularly to a load balancing method and apparatus for selecting an appropriate next-stage module for transmission of data packet in the presence of multicast capability.

Title: Deficit-based Striping Algorithm

Matter No. TERA 1001-2US

Utility Application Pending

Application #: 10/270,264

Description: The invention relates to packet-based switching fabrics, and more particularly to a load balancing method and apparatus for selecting an appropriate next-stage module for transmission of data packet of variable size.

Title: Backpressure Mechanism for Switching Fabric

Matter No. TERA 1002-1US

Utility Application Pending

Application #: 10/358,678

Description: The invention relates to switching fabrics, and more particularly to a flow control method and apparatus for fairly allocating the bandwidth capacity of the fabric to multiple input flows.

Title: Method and Apparatus for Shared Multi-Bank Memory

Matter No. TERA 1003-1US

Provisional Application Pending

Application #: 60/464,462

Description: The invention relates to packet-based switching fabrics, and more particularly to apparatus and methods for efficiently switching data packets through a central shared buffer memory.

Title: Method and Apparatus for Shared Multi-Bank Memory

Matter No. TERA 1003-1US

Utility Application in draft

Description: The invention relates to packet-based switching fabrics, and more particularly to apparatus and methods for efficiently switching data packets through a central shared buffer memory
